

# SiteManager

## Taking student security to the next level with photo credentials

ASSA ABLOY Global Solutions' SiteManager system is a secure and flexible method of storing student and visitor data. On-site storage, with student consent, keeps personal data private and local. Photo based access cards provide a simple and cost effective way of validating user identity. By providing real-time status reports of who is on and off premises, you can go one step further to ensure that your students enjoy complete security and peace of mind. The SiteManager system seamlessly integrates with Visionline, using Web API or TCP/IP protocol.

### ABOUT SITEMANAGER

The system can be set up at the main entrance or any other suitable location. It comprises:

- SiteManager server application and software
- Camera
- RFID card reader/ writer to program cards
- RFID card printer and encoder
- Site manager access card reader for doors and turnstiles
- Blank cards
- Printer ribbon

### SECURE

Once students and visitors are entered into the system, an identification card is issued with photograph and unique ID. This ID is stored either as a printed barcode or programmed RFID chip. Photo-based ID provides an extra layer of security on top of the existing encrypted card.

Real-time status reports can be accessed via the local network, while remote admin can monitor via the internet. Personal Information menus give the ability to drill down into specific user information and customized reports can be easily generated.

and more open world

## HARDWARE & SOFTWARE

Hardware, such as USB webcams and IP scanners are compatible with standard Windows OS, while the mandatory software is the latest Windows compatible version. The basic system requires one license per workstation (client version) and one license for the database server (server version). The software can be installed on multiple PCs, subject to the license agreement.

The SiteManager system is flexible, simple to operate, and easy to maintain, using tried and tested platforms. The system can be as simple or advanced as required, depending on the user's needs. Flexibly integrate with VingCard Key and effortlessly interface with major PMS and POS systems.

## PRODUCT SPECIFICATIONS

- SiteManager workstation: Windows based – laptop, PC or tablets.
- Web camera.
- RFID Card printer/encoder: the Primacy by Evolis is a high-end printer that is easy to use, flexible and fast. The Primacy delivers multiple cards at speed, due to its 100-card capacity input and output hoppers. It is the first printer in its category to offer this level of performance in such a compact form factor.
- VingCard RFID card: the contactless solution.
- RFID scanner: a multi-purpose unit suitable for access control and ID check and information.
- Handheld RFID scanner: provides the highest levels of ruggedness and functionality. The scanner is certified IP67 and IP65 rating and delivers reliable performance for the most demanding of environments and applications.
- VingCard door locks: our locks offer the latest RFID technology with the most flexible platform for future applications. Certified for use on fire doors, with an ergonomic and elegant design.
