7. Worldwide Service

   50
Our story began in 1974, when lock maker Tor Sørnes heard that an intruder had attacked his favorite singer in her hotel room.

Inspired to help, he resolved to invent a security system that would provide a unique key for every guest. His invention changed the whole lock industry.

As industry pioneers we’ve always led the way – employing innovative technology to make people feel safe and secure wherever they want to go.

ASSA ABLOY Global Solutions has products installed in more than 42,000 properties worldwide, securing in excess of 7 million hotel rooms. We continue to use advanced technology to offer security and peace of mind to both hospitality providers and their guests. ASSA ABLOY Global Solutions’s extensive international network covers more than 166 countries.
Our purpose is not simply to lock and unlock more doors—it is to unlock the feeling of safety, security and belonging for more people, wherever they want to go.

We know what it takes to unlock a feeling of security, for hotels and their guests. Our Scandinavian design is well-known throughout the world for the quality, functionality and durability it represents. Since we invented the first card lock system in 1979, we have continued to innovate and deliver high quality electronic locks and safes to the hospitality industry.

We bring experience, knowledge, modern technology and the finest materials to the task. By focusing on industry trends, modern manufacturing facilities, internal resources and a close dialogue with our customers, ASSA ABLOY Global Solutions has been able to continuously develop solutions to match customer needs. Our vast array of solutions and services are created with full compatibility in mind in order to meet the unique demands of any property or resort.

Designed according to the most demanding standards, VingCard’s electronic locks are tested to more than 1 million openings. Based on a heavy duty mortise lockcase and a solid escutcheon, the lock is as solid as it is secure. Solid brass handles fastened on the inside of the escutcheon with self-lubricating long-life bearings ensure maximum security and a true quality touch and feel.

In setting a new standard in electronic safe security design, ASSA ABLOY Global Solutions currently produces the industry’s only UL-1037 certified safe, providing guests and their valuables with the highest level in hotel security.

We are dedicated to offering advanced security solutions and peace of mind for both hospitality providers and their guests.
“We want to unlock the feeling of safety for people, wherever they want to go.”

Mobile Access Solution
Welcome back! You are ready to start check-in.
2. Mobile Access

Always setting the pace in hospitality innovation, ASSA ABLOY Global Solutions has played an integral part in developing and implementing mobile access technology throughout hospitality markets around the globe. A highly advanced mobile phone-based keyless entry solution, Mobile Access has already been installed in tens of thousands of guestrooms worldwide.

Powered by Seos®, the first ever multi-platform ecosystem for issuing, delivering or revoking digital keys, properties equipped with Mobile Access can provide guests with the ultimate check-in convenience by allowing them to use personal devices as a room key and bypass the front desk entirely.

As a result, this proven technology solution can provide the added benefits of more streamlined front desk operations and reduced costs to the hotelier.
Mobile Access

Three Different Solutions

You can choose between three variations of the solution depending upon your needs.

**Customer Integration**
This solution is created for hotels with their own app initiatives that want to integrate mobile access into their own apps and back end systems. ASSA ABLOY Global Solutions provides a Mobile Access Software Development kit (SDK) together with dedicated onboarding services to facilitate seamless integration.

**Third-Party (Certified Partners)**
This solution suits hotels that want mobile app functionality beyond access control alone, but don’t yet have their own in-house app initiatives. They can choose a solution from one of our selected app specialist partners, who through our Certified Partner Program have already integrated our mobile access functionality into their products.

**ASSA ABLOY Global Solutions Mobile Access App**
This is our own ready-to-use, off-the-shelf solution. The app suits hotels that want to provide basic mobile access solutions to their guests in a simple to use format. There are no integrations or third-party dependencies required.

We publish a general app that is available in the App Store and on Google Play. Through an administration portal, hotels can customize their digital key graphics to reflect company branding or design. This will then show in a “Passbook” inspired style for the hotel to use.
Benefits of Mobile Access

Benefits for the hotel

Better guest experience
By improving service levels and the guest experience, Mobile Access builds customer loyalty as well as the hotel’s image and brand. Such a central feature adds value to hotel’s mobile strategies, making them more relevant to the hotel’s customers.

Operational efficiencies and guest service
On the operational side, Mobile Access streamlines front desk operations, reduces cost and frees up the front desk team to focus on other important aspects of guest service.

Increased loyalty and profitability
Mobile Access technology facilitates one-to-one communication with the hotel guests, ultimately driving customer loyalty and revenue. Together all the benefits of Mobile Access lead to enhanced hotel image and guest loyalty. This, creates more efficient operations that reduces cost driving revenue, improved profitability and increased competitiveness.

Benefits for the hotel guests

Unique user experience
Mobile Access offers guests a whole new hotel experience. Depending on the solution deployed they can reserve and book their room using their mobile phone or device. They can then use the phone to check in and check out.

Skip front desk - No queues
When guests arrive, guests can go straight to their room using their own smartphone to open the door. No need for keys or keycards. There is no need to wait in a queue at the front desk after a long journey. This seamless experience is secure, convenient and saves everyone time.
Mobile Access

How it Works

Regardless of the solution deployed, the same core Mobile Access will give guests an experience that is convenient, secure and timesaving.

1. The hotel guest downloads the app, registers his/her smartphone through the app and allows push notifications.

2. The guest makes a reservation and approximately 24 hrs. before arrival, he/she is invited through a push notification to use Mobile Access and start the check-in process.

3. The guest receives a push notification noting that he/she is checked in and the app will update with the room number and the digital key when the room is ready.

4. Upon arrival the guest can bypass the front desk and go directly to his/her room.

5. After ensuring that the Bluetooth is enabled, the guest simply holds the smartphone to the door lock, waits for the solid green light and enters the room.
“Imagine the convenience of being able to open doors through a digital key stored on your smartphone... Now you can.”
3. VingCard Electronic Locks

Designed according to the most demanding ANSI grade 1 standards, VingCard’s electronic locks are tested to more than 1 million openings. Based on a heavy-duty mortise lockcase and a solid escutcheon, the lock is as solid as it is secure. Stainless steel handles fastened on the inside of the escutcheon with self-lubricating long life bearings ensure maximum security and a true quality touch and feel.

Since 1979, research and development has been a key element for us in finding new solutions for the future. By working together as a team, using our learning experience from the market and combining it with our know-how, we are able to develop tomorrow’s solutions.

The modular construction makes it easy to change and service parts without changing the complete lockset. Due to our future-proof philosophy the lock software can be upgraded in the field at any time when needs change without changing or removing any hardware.
Electronic Locks

VingCard Allure

VingCard Allure is a designers’ dream. Unique design and exceptional features make Allure more than imagined. Its appearance is not like traditional locks and it is more flexible than ever before. Appearance and functionality can now be chosen based on specific needs and desires for the property. Both Allure Grand and Solo support Mobile Access and can be ready to use simply by adding our BLE module.

Features:
- The industry’s most advanced and secure RFID technology
- Wall-mounted panel with LED light information indicators
- Wall reader with customizable intelligence and functionality
- Stylish panels with flexible design options
- Illuminated room number option with 16 selectable LED light color themes
- Inside panel for setting “Do Not Disturb” (DND) and “Make Up Room” (MUR) status
- Standalone solution for DND/MUR setting and status display
- Wireless communication between wall and door unit
- Online connectivity with Visionline Wireless (ZigBee) or Visionline Wired (PoE)
- Integration with GRMS

ACCESS PANEL

The most advanced VingCard Allure panel has all available functions included.

You get an RFID lock, based on VingCard’s well-known RFID locking solution and quality, “Make Up Room” (MUR) and “Do Not Disturb” (DND) status indicators, a doorbell button and room number display.

ROOM STATUS PANELS

When a lock is not required, Allure can also be supplied as a room status panel with MUR and DND indicators, in addition to a doorbell button.

This panel is suitable if you already have an electronic locking solution or for rooms where a lock is not required, such as a conference room.

IN-ROOM PANELS

To activate the MUR and/or DND room status, it is necessary to have an in-room switch panel. This panel can be installed wherever it is suitable or convenient.

VingCard’s room bus system also allows multiple panels within one room or suite.
Electronic Locks

VingCard Essence

VingCard Essence revolutionizes the electronic lock industry by housing all lock components, including the reader and mobile access board, inside the door. Reaching the maximum minimalistic expression, it is the true essence of an electronic lock.

VingCard Essence is always delivered as Mobile Access ready. With the Mobile Access board included inside the reader, your property is ready for using mobile phones as guestroom keys whenever needed.

Features of VingCard Essence

- Minimalistic design with electronics inside the door
- Provides a wide range of design options for handles
- RF Online capability (wireless)
- New stylish reader design
- RFID reader with improved reading distance
Electronic Locks

VingCard E100

The VingCard E100 with RFID reader is supported by the Visionline system and software. With a wide range of escutcheons for different regions and cylinder profiles, the E100 can be used with a variety of standard and narrow profile lock cases. The range is suitable for both guest room doors and back of house applications where the door types may vary.

Currently not available in US & Canada. Available where German DIN and Scandinavian Industry Standards (SIS) applies.
Electronic Locks

VingCard Signature

With Signature RFID you are provided with a stylish and modern lock that appeals to the modern hotel environment. Signature RFID is less on the door and more for you and your guests in terms of functionality and user friendliness.

Upgrade to RFID Technology

- 3-5 minute operation.
- No need to replace the lockcase or handles.
- No drilling required.
- No downtime in room availability.
- No disturbance for your guests.
Electronic Locks
VingCard Classic

Classic RFID derives from the standard Classic lock and allows you to go contactless in a few short steps if you already have standard Classic installed. With its sleek and elegant design, available in all VingCard lock finishes, you now have a second method of upgrading to RFID functionality depending on your choice of style.

Upgrade to RFID Technology

- 3-5 minute operation.
- No need to replace the lockcase or handles.
- No drilling required.
- No downtime in room availability.
- No disturbance for your guests.
Electronic Locks

VingCard Flex

With VingCard Flex you are provided with a robust RFID lock that is specially developed for upgrading properties from Timelox S-series installations to the newest RFID lock hardware platform without drilling the door. VingCard Flex is fully compatible with the latest solutions for Mobile Access and RF online communication.

- 3-5 minute installation time
- No need to drill holes or use mortise tools
- Keep old Timelox lock cases for even greater upgrade savings
- Tubular latching compatible
- Update to RFID and Mobile Access quickly and affordably
- Less maintenance compared to magstripe
- Supports Zigbee online functionality
**Electronic Locks**

**Options, Finishes and Handles**

**Optional PVD finish (Physical Vapor Deposition) - for extreme conditions:**
ASSA ABLOY Global Solutions offers an exclusive PVD coated finish that protects the lock finish from corrosion, UV rays, salt, extreme weather conditions, aggressive cleaning products and more. PVD not only maintains the finish of the lock for longer, it is also covered by a 10-year warranty.

The PVD finish is available as an optional feature only for Signature locks in the following finishes only: Satin - Chrome or Brass and Polished - Chrome or Brass.

**Mobile Access**
The latest generation of all VingCard RFID locks (Allure, Essence, Signature, Classic and Flex) are compatible with Mobile Access. The only thing needed is to add a small Bluetooth Low Energy (BLE) board to the lock.

**Cylinder options**
VingCard locks may also be supplied with an optional mechanical key override cylinder.
- Use of mechanical key override is registered in the lock memory for audit trail.
- Mechanical cylinder can be either visible or not visible with a cylinder concealer (Signature only, finish may vary from lock finish).
- Superior pick resistance through its 7 pin high security profiles and narrow channel paracentric keyway and anti-pick drivers.
- Unique cylinder fixing for added security.
- 5 times recodable cylinder.
- Cylinder is available in all lock finishes.

**Automatic deadbolt option**
The automatic deadbolt lockcase has been produced to provide our customers and their guests with an added measure of security. Automatically extending the deadbolt upon door closure ensures that the security of the deadbolt is present without the guest having to remember to extend it via the thumb turn.
Handle options
To truly match the style requirements at your property, we also offer a wide range of handle options.

*1 - Available only for Classic Lock.
2* - To be installed on the inside of door, regular handle is needed on the outside.

Finishes
Offering one of the industry’s widest choices of finishes, VingCard electronic locks can be configured to truly match the design of any property. *

*1 - Available only for Classic Lock.
2* - To be installed on the inside of door, regular handle is needed on the outside.

* Pictures of finishes might differ from reality.
Because your hotel requires the most exclusive and luxury touch, and you want to offer a personal and unique experience to your guests, ASSA ABLOY Global Solutions has created an optional Designers’ Collection in order to offer you the most extensive and exclusive designer handles for electronic locks today.

VingCard has partnered with the following renowned designers through the famous Italian handle crafter Valli&Valli: Norman Foster and Partners, Gustav Peichl, Antonio Citterio, Gregotti Associati, Sottsass Associati and Taller Design Ricardo Bofill. Our designer handles are compatible with Signature, Essence and Allure.

1) Up to 2 years normal lifetime.
2) Special handle for the State of California
Electronic in-room safes contribute to raising the security level in your hotel, increasing your guests’ peace of mind.

Our in-room safes are tested by the world’s most recognized and respected product testing organization Underwriters Laboratories. Elsafe Infinity is the first UL-listed in-room safe in the 1037 category for anti-theft devices. This prestigious UL listing is now awarded to both the Infinity and Sentinel models, including physical break-in tests, endurance tests and jarring tests.

The exclusive UL-1037 listing achieved by Elsafe’s in-room safes gives you added assurance that your guests’ valuables are receiving the maximum level of protection possible. Not only does this protect your guests’ property, it also protects your property’s valuable reputation. With Elsafe, your guests can rest easy and so can you.
Electronic Safes

Elsafe Infinity II

Elsafe’s Infinity II series introduces, a new era in hotel in-room safes. Infinity II is ideal for the most demanding hotels, lifestyle brands and boutique properties that strive to be different. By combining sophisticated technology and fashionable design, Infinity II is the ultimate safe for the design-conscious hotelier.

Standard features:

- UL-1037 certified for physical security.
- Industry-leading audit trail.
- Confirmation buzzer.
- Convenient inside light.
- Anti-tamper switch.
- Easy outside battery change.
- Unique modular construction for easy upgradeability.
- Spring-loaded door.
- Backlit keypad.

Security - UL Listed

This prestigious UL listing is now awarded to both the Infinity and Sentinel models, including physical break-in tests, endurance tests and jarring tests.
Electronic Safes

Elsafe Sentinel II

Elsafe goes beyond the ordinary with its new Sentinel II hotel in-room safe series. We have taken in-room security to a new level and combined it with a functional and trendy design. Sentinel II electronic in-room safe is more than just an in-room safe. It has become an important style element that blends into any environment! This new safe series operates with digital keypad.

Elsafe Sentinel II Digital in-room safe gives you the highest standard in hotel in-room security with the UL-1037 certification. Our hotel safes set the pace with the most unique features offered in electronic safes for hotels.

**Standard features:**
- UL-1037 Certified for physical security.
- Industry-leading audit trail.
- Easy outside battery change.
- Spring-loaded door.
- Unique modular construction for easy upgradeability.
- Backlit keypad.
- Convenient inside light.

**How does UL-listing benefit you?**

The exclusive UL-1037 listing achieved by Elsafe’s in-room safes gives you added assurance that your guests’ valuables are receiving the maximum level of protection possible. Not only does this protect your guests’ property, it also protects your property’s valuable reputation.
Electronic Safes

**Elsafe Zenith**

The choice of in-room electronic safes becomes easy when you can choose Elsafe Zenith to secure your guests’ belongings. Zenith is advanced and economical security, with the industry’s leading audit trail system that allows you to print out comprehensive reports on all safe activities.

- Industry-leading audit trail.
- Backlit keypad.
- Spring-loaded door.
- Anti-tamper labyrinth.
- Unique triangular locking bolt reinforcement.
- Easy outside battery change
- Convenient inside light.

**Zenith safes options**

Zenith is available in many sizes and models to complement your room regardless of style and need.

**Zenith Drawer**

Zenith Drawer is the ideal solution for hoteliers who want to maximize convenience for their guests and encourage use of the in-room safe. It provides superior design flexibility, allowing for placement inside drawers, cupboards...or anywhere in the room that it is most accessible and easy for guests to use.

**Zenith Standard**

The standard Zenith (ZD27/ZD43/ZDWI) can accommodates up to 17” laptop and meets any guestroom space limitation and location requirement.
Zenith In-Wall

Zenith In-Wall Safe is the ideal solution for hotels that need to maximize limited guestroom space. Zenith In-Wall Safe fits perfectly on any cupboard, armoire or closet wall as well as on the guestroom wall.

Zenith Floor and Drop

Zenith Floor and Drop is a large size safe mounted to the floor that provides ample storage space for exclusive suites and back offices.

Impress your guests with our wide variety of safe colors

6. System & Software

Originally developed to maximize the networking capabilities of VingCard’s industry leading electronic locking systems, Visionline allows your locks to communicate with the server via online radio frequency (RF), eliminating the need to manually encode keycards, cancel staff cards and check battery life.

Visionline is the only wireless, highly-secured and open standards-based platform to address the unique needs of low-power monitoring and access-control network applications. Operating on a reliable and secure platform like ZigBee provides increased reliability and performance at an affordable cost. In addition, the wireless network enables smooth interface and integration opportunities for other online devices, including safes and minibars.
Visionline is built on the ZigBee Standard ISO 802.15.4 high-security open platform, the only wireless, highly-secured and open standards-based platform to address the unique needs of low-power monitoring and access-control network applications. Operating on a reliable and secure platform like ZigBee provides increased reliability and performance at an affordable cost. In addition, the wireless network enables smooth interface and integration opportunities for other online devices, including safes and minibars.

- More Security and Control
- More Services to your Guests
- More Efficient and Cost Effective Operations
- More Efficient Front Desk Operations
- More Efficient Engineering and Maintenance

**Visionline Options**
Visionline is a highly flexible system that can consist of a combination of offline and online doors. Both wireless ZigBee and wired Ethernet can be used to create the most efficient system for your individual property needs. For Visionline wired online, PoE can be used as well.
Visionline is modular and consists of several different online modules that can be built as you prefer. These modules are Standard, Advanced, Communication, Safety, Online In-room Safe, Mobile Access and Loyalty program.

### Software Packages

**Standard Online Module**
- Central card cancellation
- Remote audit trail
- Low battery report
- Extended stay
- Room move
- Auto check-out of guest card
- Data Warehouse

**Advanced Online Module**
- Door ajar alarm
- Inside opening audit trail
- Wandering intruder alert
- Sequential intruder alert
- Block cards per user group and section
- Live tracking of cards
- Insert maintenance report card
- Online passage mode activation

**Online In-room Safe Module**
- Warning if safe is locked upon check-out
- Low battery warning
- Mechanically opened alert
- Clear safe memory warning
- Automatic synchronization of date/time
- Remote audit trail
- Remote service reports

**Communication Module**
- SMS/E-mail alert
- On screen alarm panels

**Loyalty Program Module**
- Remote check-in/check-out
- Bypassing reception queues
- Using RFID loyalty guest card

**Mobile Access Module**
- Manages ASSA ABLOY Mobile Access credentials

**Safety Module**
- Open doors from a central location
- Close doors from a central location

---

1. Special conditions apply
Visionline is available in both offline and online mode. In offline mode your property will benefit from a customized and flexible security solution without compromising security or convenience. The offline version allows you to upgrade at any time.

</table>

¹. The operation have to be done by programming lock by lock manually.
². Audit trails are available by performing a read-out directly from the lock itself.
7. Accessories

ASSA ABLOY Global Solutions offers an extensive range of accessories and security hardware options to complement your hotel locking system and provide enhanced security.

These include such items as keycards and RFID carriers, as well as complementary hardware for cohesive guestroom design, such as bathroom locks, door retainers, door viewers. Back-of-house and facility access hardware, such as elevator controllers, exit devices and more are also included in our product range, and are designed to meet various standards. An overview of our comprehensive offerings is provided on the following pages.
Radio Frequency Identification, contactless technology

VingCard RFID electronic locks share the same technology together with the RFID safes from Elsafe. Our RFID locks offer the latest Radio Frequency Identification (RFID) technology with the most flexible platform for future applications:

- 13.56MHz technology.
- Compatible with following standards:
  - ISO 14.443 A (MIFARE)
  - ISO 14.443 B
  - ISO 15.693
- Compatible with NFC (Near Field Communication) and BLE (Bluetooth Low Energy) Technology. NFC and BLE technology enable contactless communication between our electronic locks and cell phones equipped with NFC and/or BLE.

Benefits with RFID technology:

- More Guest Satisfaction: Unmatched ease of use for guests of all ages. No need to insert the keycard.
- More Security: Anti-cloning technology for all guest and staff cards. Unlike magnetic strip whose keycards can be cloned, RFID technology allows powerful anti-cloning solution.
- More Adaptability: RFID keycards and carriers adapt to any hotel style. You can choose from low cost guest cards, long lasting staff cards, wristbands and keyfobs to perfectly match different hotel types such as Business, Resort, Spa, All-inclusive payment.
- BLE Bluetooth Low Energy and NFC (Near Field Communication).
- More Information and Control: VingCard RFID electronic lock can write back information on staff RFID keycards for better information and management such as staff card audit trail, low battery status, cylinder tamper alarm.
- More Integration: You can integrate and interface VingCard RFID keycards with other applications at your hotel (loyalty programs, vendor payment, etc.)
- More Exclusivity: Provide a new experience for your customers and enhance the image of your hotel
- More Durability: VingCard RFID electronic lock components are sealed and provide better performance for outdoor use.
- More Selection: Provides access today to next generation technologies such as BLE Bluetooth Low Energy and NFC (Near Field Communication).
- More Standards: VingCard RFID electronic locks offer 4 technology standards in 1 electronic lock.
RFID Carriers

ASSA ABLOY Global Solutions offers a wide range of RFID carriers that are especially designed for different applications (for guests, staff or VIP guests) and give you the opportunity to enhance your guests’ experience at your hotel.
Accessories

Wide Variety of Accessories

**RFID Remote Controller**
This independent unit provides access control to common doors, such as parking, health clubs, conference suites, staff entrances or guest night entrances. VingCard Remote Controllers are fully compatible with all of VingCard’s card locking systems and Mobile Access compatible.

**RFID Elevator Controller**
VingCard’s Elevator Controller is designed to be built into the elevator panel and operates offline. The security level of the hotel will increase, as only guests with a valid keycard will have access to the elevators/floors.

The Elevator Controller is compatible with all of VingCard’s card locking systems and is Mobile Access compatible.

**RFID Exit Device**
Our Exit Device works with your VingCard electronic card locking system. This makes it possible to use encoded cards to control all guest and staff access to the building, while providing a panic exit device to satisfy all safety considerations for emergency exit. Opening the door from the inside is achieved by simply pushing the push bar.

**Mechanical Locks**

**Bathroom Locks**
VingCard’s Bathroom Lock has an occupancy indicator and a thumb turn, making it easy to change the lock case handing from left to right. The Bathroom Lock is delivered in Satin Chrome, Satin Brass, Polished Chrome and Polished Brass.

**Mechanical Locks for Back of House**
The VingCard 1000-series cylinder locks are designed to complement VingCard’s electronic locks, ensuring uniform appearance in guestrooms and corridors.
- Available in ANSI and EURO.
- Staff key will fit into cylinder keyways.
- UL-fire listed.
**Additional Items**

**Door Viewer**
ASSA ABLOY Global Solutions high quality Door Viewer with glass lens has a super wide 200° all round clear angle of view. The to enhance your system is delivered in Satin Chrome or -Brass and Polished Chrome or -Brass.

**Door Retainer**
ASSA ABLOY Global Solutions Door Retainer prevents entry of intruders and increases the resident’s safety. Is delivered in Satin Chrome or -Brass and Polished Chrome or -Brass.

**Energy Control Unit**
ASSA ABLOY Global Solutions offers a complete range of in-room Energy Control Units, the perfect combination for providing in-room comfort to your residents while, saving energy and money when they are away from their rooms.

**Locker Lock**
The RFID Locker Lock is a contactless operated lock the ideal for spa and wellness centers, ski resorts, golf clubs, sport and gym centers and is fully compatible with VingCard RFID locking system.

**Polarbar Minibars**
Polarbar offers a wide range of minibars. For more information about Polarbar, please visit: www.assaabloyglobalsolutions.com
Offering top-of-the-line customer service has always been a priority at ASSA ABLOY Global Solutions. No matter where you are in the world or which product you are using, we dedicate ourselves to providing the best support and guidance, whenever you need it.

ASSA ABLOY Global Solutions’s extensive international network covers more than 166 countries giving us the ability to offer global sales and support for our customers. Our global network allows our valued customers to enjoy the benefits of worldwide resources, convenience of local service, and round-the-clock support 24 hours a day, 365 days a year *. Our technical support technicians are available worldwide to answer any questions or concerns you may have, giving you the support you want when you need it most.

ASSA ABLOY Global Solutions believes every customer is a customer for life, committing us to a partnership with all of our customers in the hospitality industry.

For more information on our Worldwide Service and local locations, visit our Service & Support page at: www.assaabloyglobalsolutions.com

* 24/7 support is subject to local service and maintenance contract terms. Please contact your local representative for local service hours.
ASSA ABLOY is the global leader in door opening solutions, dedicated to satisfying end-users needs for security, safety and convenience.
