

# Copper Tape for Electronic Lock Handles

The Copper Tape is a self-adhesive tape that can assist with a property's cleanliness and health safety efforts. Able to be applied to existing handles in less than 1 minute, Copper Tape serves as a short term, yet quick solution that may aid in preventing the spread of germs by direct shared surface contact.

It can be used on all existing doors equipped with a smooth and metallic handle surface. Applying to other handle textures is not recommended.

## HOW TO APPLY

### 1. Start with a clean surface

Clean the door handle so that it is dry and free of oil, grease, dust and dirt. Do not use window-cleaning products. They may leave a residue behind, making your tape cling less effectively.

### 2. Adjust the Tape

Place the tape with the long side against the handle and wrap around so that the tape completely covers the handle one time. If the tape overlaps more than 1cm, mark excess material and cut the tape to size.

### 3. Adhesive bonding

Carefully peel off the backing paper by pulling it flat back on itself and stick the tape on so that the beginning and end of the tape meet at the bottom of the handle. Slide the tape from the middle outwards into final position.

## TECHNICAL DATA:

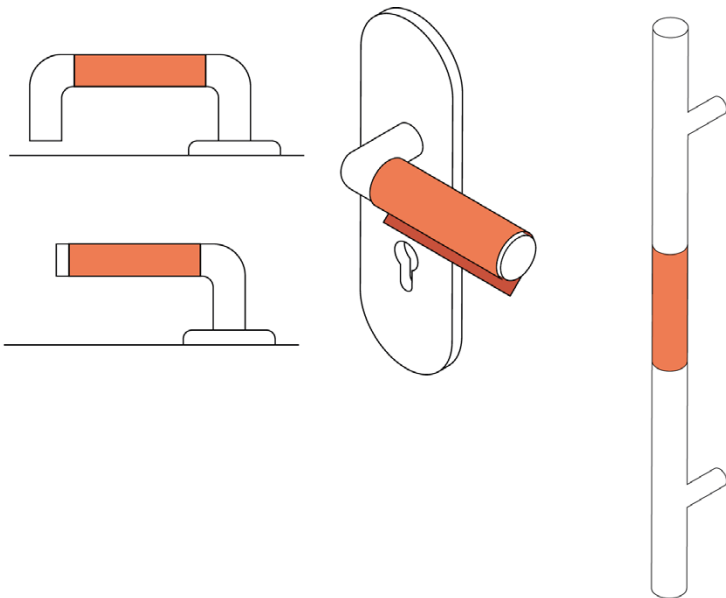

Size of the blanks:	8 cm x 10 cm x 0.55 mm
Surface material:	Copper-plated polyamide fleece
ANSI backset	70 mm / 2,76 inches.
Adhesive material:	Acrylic (adhesive resistance -40 °C to +120 °C)
Storage:	Cool and dry, at 15-25 °C to 65% relative air humidity
Quantity:	1 pair/2 sheets - enough for two standard door handles
Estimated life of Product:	Copper Tape is an antimicrobial solution intended for short term use. Periodically replacing the tape is recommended. Time frames for Copper Tape replacement may vary depending on frequency of use, with signs of corrosion or color change indicating the need to remove and apply new tape.

## SAFETY INSTRUCTIONS:

This product serves as a supplementary measure and does not replace hygiene measures such as regular, thorough hand washing or hand disinfection.

- Keep away from power sources – product is conductive
- Keep away from children
- Avoid eye contact
- Do not swallow, do not put in mouth
- Copper can cause allergic reactions
- Color change is normal (oxidation)
