

Door retainer Accessories

Door retainers are a highly recommended addition to the guestroom doors at your property, in order to further ensure guest security. By using a door retainer, it is easy for guests to identify staff or other visitors before allowing them to enter the room and if used accordingly, to prevent intruders from getting in when the door is opened. Our door retainers are suitable for new doors, as well as for retrofitting or replacing old, worn-out retainers, and are the only retainers on the market that can be pulled down vertically against the door frame in rest position. We advise that every guestroom be equipped with our high-quality door retainers, which are suitable for all types of properties, with or without VingCard locks installed.
