

Vostio Location Solutions

Staff Safety

Housekeeping and other staff members are exposed to threats and harassments far too often. Many incidents are life threatening, where every second counts until help arrives. With the Staff Safety solution from ASSA ABLOY Global Solutions, the real time location of an employee can be tracked within moments when a distress button is pressed. Via a comprehensive alert life cycle management process, response personnel are instantly alerted to an emergency through a designated web portal that can be accessed from any PC or tablet with an internet connection. The portal also provides a dashboard view on hardware status, active alerts, and a log of all distress alerts with associated forensic data.

KEY BENEFITS

- : Cloud-based solution, always up-to-date and monitored
- : Provides a sense of safety for staff
- : Meets the AHLA-5-Star promise
- : Intuitive and easy-to-use
- : Easy setup and installation
- : Scalable and easy to add new devices
- : 24/7 tech support
- : Scalable for additional solutions using the same IoT network

HARDWARE

BluFi Gateway

- : BLE to WiFi Bridge
- : AC or DC powered (+PoE)
- : Can function as wayfinding beacon for phones
- : Can count WiFi probing MACs
- : Plug & Play

Alert Device (BLE Beacon)

- : Two form factors – badge and fob
- : Encrypted communications
- : Average 2-year battery life span
