

EDUCATION SOLUTIONS

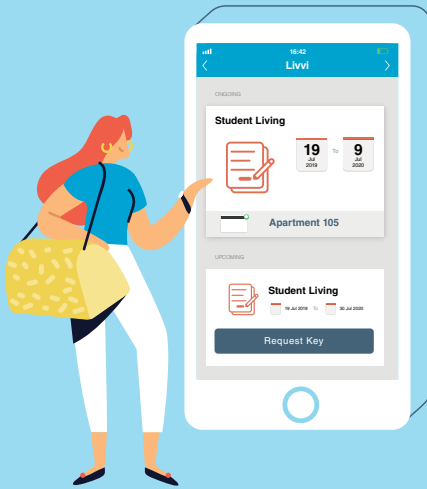

Reimagining how students
move through their world

ASSA ABLOY
Global Solutions

The global leader in
door opening solutions

Livvi – THE MOBILE ACCESS APP FOR STUDENTS

Our own ready-to-use, off-the-shelf solution suits residences that want to provide students with mobile access in a simple, intuitive package. No integrations or 3rd party dependencies required.

- 1 Download the app
- 2 Register the device
- 3 Receive digital key
- 4 Unlock the room

The Livvi app is available through Apple App Store and Google Play. An administration portal lets residences customize Digital Key graphics to reflect their chosen design. The finished product can then be shown in a 'Passbook' style, for residence use.

Benefits for students

- One device for locking and interacting
- More convenience – no need to carry a key
- More security – encryption, plus the password protection the phone itself provides
- Intuitive app
- Unique user experience

Benefits for the residence administrator

- More security – no risk of sharing cards or subletting
- Ease arrival and 'changeover day' stress – no more queues
- Simple, intuitive and centralized oversight
- Seamless, smooth upgrade – easy to add to existing VingCard locks
- Easy to combine with user credentials – cards and fobs on same system
- Lock battery status reporting for efficient maintenance

MOBILE ACCESS

SIMPLE. SECURE.

SMART.

The way we relate to technology has fundamentally changed. Mobile devices provide new ways to move through our world, simplifying transactions, but also raising new questions about convenience and security.

ASSA ABLOY mobile access for education offers the best of both worlds – ease throughout the day, while providing leading security and encryption. Powered by Seos®, the first ever multi-platform ecosystem for issuing, delivering, and revoking digital keys, properties equipped with mobile access allow users to use their personal devices as keys, with the minimum of administrative involvement.

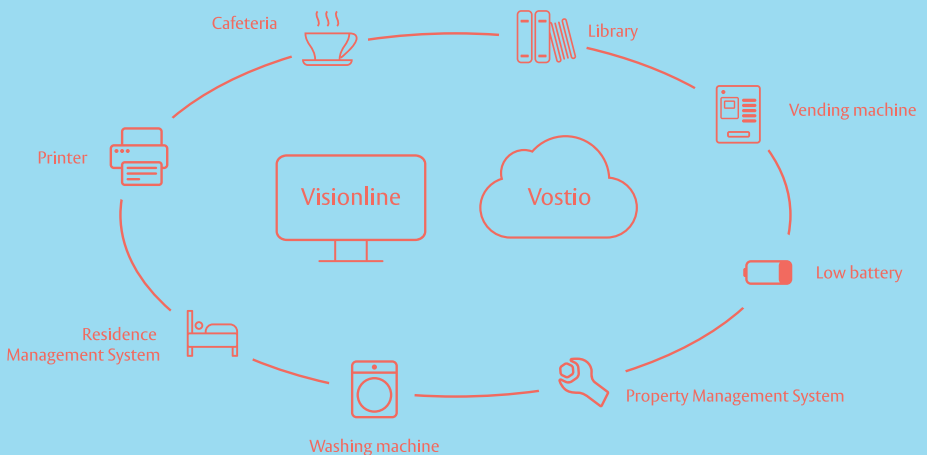

ACCESS MANAGEMENT FOR STUDENT HOUSING

With ever more ways to interact with electronic locking systems, it is vital to have one seamless, coherent solution that brings everything together, ensuring simple, intuitive security.

A FULL SOLUTION THAT INCLUDES

- Access management software
- Electronic locks
- Credentials
- Mobile access
- The latest contactless and encryption technologies

In the cloud and on-site.

Our solution integrates easily with other systems, thanks to SDK and Web API, forming part of a larger student-life ecosystem.

Vostio – At home. In the cloud.

Vostio brings residence management to the cloud, offering access management anytime, anywhere, whether for a single residence or multiple locations. Future proof and secure your access management systems, with automatic updates and one simple, central hub for all operations. Peace of mind has never been easier.

KEY BENEFITS

- No local servers, no maintenance – automatic upgrades and security patches
- Scalable and modular to fit any size of operation
- Designed with security and privacy in mind, allowing you to be compliant with General Data Protection Regulations (GDPR)
- Local fallback functionality – able to operate if internet access goes down

Visionline – System and Software Solutions

Visionline is highly flexible, working with both offline and online doors. Online solutions can be created by combining wired ethernet and wireless ZigBee locks to create the most efficient setup for your individual needs. For Visionline wired online, PoE (power over ethernet) can be used. Visionline has extensive reporting capabilities, allowing administrators to view many key data aspects, from low battery reports to full audit trail.

Built on ZigBee Standard, the only wireless, highly secure and open standards based platform.

Software Packages

ADVANCED ONLINE MODULE

- Door ajar alarm
- Inside opening audit trail
- Wandering intruder alert
- Sequential intruder alert
- Block cards per user group or section
